

TABLE OF CONTENTS

PREFACE	ii
CHAPTER 1 INTRODUCTION	1-1
1.0 WHAT IS PAVEMENT PRESERVATION?	1-1
2.0 PAVEMENT STRUCTURE AND DESIGN	1-3
2.1 WHAT IS A PAVEMENT?	1-3
2.2 FLEXIBLE AND RIGID PAVEMENTS	1-4
2.3 PAVEMENT STRUCTURE	1-5
2.3.1 <i>Foundation</i>	1-5
2.3.2 <i>Base Layer</i>	1-5
2.3.3 <i>Surfacing Layer</i>	1-6
3.0 COMMON DISTRESSES IN PAVEMENT STRUCTURES AND TYPICAL TREATMENTS	1-7
3.1 DISTRESS IN THE SUBSURFACE LAYERS	1-7
3.2 DISTRESSES IN THE SURFACE LAYER	1-8
3.3 TYPICAL TREATMENTS	1-8
4.0 MATERIALS	1-8
4.1 STANDARD PAVING ASPHALT – AGED RESIDUE (AR) GUIDE	1-9
4.1.1 <i>What is Standard Paving Asphalt</i>	1-9
4.1.2 <i>How is Standard Paving Asphalt Manufactured?</i>	1-9
4.1.3 <i>Specification of Conventional Asphalts</i>	1-10
4.2 ASPHALT EMULSIONS	1-12
4.2.1 <i>What is an Emulsion?</i>	1-12
4.2.2 <i>How are Emulsions Made?</i>	1-13
4.2.3 <i>What are Emulsifiers and What Types of Emulsions are Used?</i>	1-15
4.2.4 <i>Anionic or Cationic: Which to Use?</i>	1-17
4.2.5 <i>Specifications and Testing</i>	1-19
4.3 CUTBACKS	1-22
4.3.1 <i>What are Cutbacks?</i>	1-22
4.3.2 <i>Manufacturing</i>	1-22
4.3.3 <i>Specifications and Testing</i>	1-23
4.4 POLYMER MODIFIED BINDERS (PMB'S) & PERFORMANCE BASED ASPHALTS (PBA'S)	1-23
4.4.1 <i>What are Polymers and Polymer Modified Binders?</i>	1-23
4.4.2 <i>How Polymer Modified Binders are Manufactured</i>	1-24
4.4.3 <i>What are Performance Based Asphalts?</i>	1-25
4.5 ASPHALT RUBBER	1-25

TABLE OF CONTENTS

4.5.1	<i>What is Asphalt Rubber?</i>	1-25
4.5.2	<i>How is Asphalt Rubber Manufactured?</i>	1-26
4.6	AGGREGATES	1-27
4.6.1	<i>What are Aggregates?</i>	1-27
4.6.2	<i>How are Aggregates Manufactured?</i>	1-29
5.0	STORAGE AND HANDLING	1-29
5.1	CONVENTIONAL AND MODIFIED ASPHALTS	1-29
5.1.1	<i>Avoiding Problems During Storage</i>	1-30
5.1.2	<i>Recommended Storage and Handling Temperatures and Times</i>	1-31
5.2	ASPHALT EMULSIONS	1-31
5.2.1	<i>Handling</i>	1-31
5.2.2	<i>Transport Handling</i>	1-32
5.2.3	<i>Storage</i>	1-32
5.3	STORAGE AND HANDLING OF AGGREGATES	1-35
6.0	SAMPLING BINDERS AND AGGREGATES	1-36
6.1	GENERAL SAMPLING	1-36
6.2	GENERAL TESTING DETAILS	1-36
7.0	REFERENCES	1-37
CHAPTER 2 FRAMEWORK FOR TREATMENT SELECTION		2-1
1.0	INTRODUCTION	2-1
2.0	SELECTION PROCESS	2-2
2.1	ASSESS THE EXISTING CONDITIONS	2-2
2.2	DETERMINE THE FEASIBLE TREATMENT OPTIONS	2-2
2.3	ANALYZE AND COMPARE THE FEASIBLE TREATMENT OPTIONS	2-5
2.3.1	<i>Cost Effectiveness</i>	2-6
2.3.2	<i>Choosing from the Maintenance Treatment Matrix</i>	2-6
3.0	REFERENCES	2-8
CHAPTER 3 CRACK SEALING, CRACK FILLING & JOINT SEALING OF FLEXIBLE & RIGID PAVEMENTS		3-1
1.0	INTRODUCTION	3-1
1.1	TYPES OF CRACKS	3-1
1.1.1	<i>Flexible (AC) Pavements</i>	3-1
1.1.2	<i>Rigid (PCC) Pavements</i>	3-3
1.2	PROJECT SELECTION	3-4

TABLE OF CONTENTS

1.3	PROJECT PLANNING	3-4
1.4	WHETHER TO SEAL OR FILL	3-4
1.4.1	<i>Crack Sealing</i>	3-6
1.4.2	<i>Crack Filling</i>	3-6
1.5	TREATMENT PERFORMANCE	3-7
1.5.1	<i>Treatment Failures</i>	3-7
1.5.2	<i>Treatment Effectiveness</i>	3-7
1.5.3	<i>Cost Effectiveness</i>	3-8
2.0	MATERIALS	3-8
2.1	MATERIALS	3-8
2.1.1	<i>Materials for Crack Sealing</i>	3-8
2.1.2	<i>Materials for Crack Filling</i>	3-9
2.2	STORAGE AND HANDLING OF MATERIALS	3-10
2.3	MATERIAL PLACEMENT METHODS	3-10
2.3.1	<i>Flush Fill Method</i>	3-10
2.3.2	<i>Overband Method</i>	3-10
2.3.3	<i>Reservoir Method</i>	3-11
2.3.4	<i>Combination Method: Reservoir with Band-Aid</i>	3-11
2.3.5	<i>Combination Method: Sand Fill with Recessed Finish</i>	3-12
2.3.6	<i>Backer Rod (PCC Pavements)</i>	3-12
2.4	SELECTING THE APPROPRIATE PLACEMENT METHOD	3-13
3.0	CONSTRUCTION	3-14
3.1	SAFETY AND CONTROL	3-14
3.2	EQUIPMENT REQUIREMENTS	3-14
3.3	CLIMATIC CONDITIONS	3-14
3.4	PREPARATION	3-14
3.4.1	<i>Routing or Sawing</i>	3-15
3.4.2	<i>Cleaning and Drying</i>	3-15
3.4.3	<i>Backer Rod (PCC Pavements)</i>	3-16
3.4.4	<i>Application of Sealer or Filler</i>	3-16
3.5	FINISHING	3-17
3.6	TRAFFICKING AND SUBSEQUENT TREATMENTS	3-18
3.7	JOB REVIEW – QUALITY ISSUES	3-18
4.0	TROUBLESHOOTING	3-19
4.1	TROUBLESHOOTING GUIDE	3-19
5.0	REFERENCES	3-21

TABLE OF CONTENTS

CHAPTER 4 PATCHING AND EDGE REPAIR	4-1
1.0 DESCRIPTION	4-1
1.1 PATCHING	4-1
1.2 DIG OUTS	4-2
1.3 PAVEMENT EDGE REPAIRS	4-2
1.4 SURFACE REINSTATEMENT	4-2
2.0 PROJECT SELECTION	4-3
2.1 POTHOLE	4-3
2.2 EDGE FAILURE	4-4
2.3 COSTS AND PERFORMANCE	4-4
2.4 DESIGN AND SPECIFICATION	4-5
3.0 CONSTRUCTION PROCEDURES	4-5
3.1 POTHOLE PATCHING	4-5
3.1.1 <i>Throw and Roll</i>	4-5
3.1.2 <i>Semi-Permanent Patches</i>	4-6
3.1.3 <i>Injection Patching</i>	4-7
3.1.4 <i>Edge Sealing</i>	4-8
3.2 DIG OUTS AND EDGE REPAIRS	4-9
3.2.1 <i>Dig Outs</i>	4-9
3.2.2 <i>Edge Repair</i>	4-10
3.3 SKIN PATCHING (SURFACE REINSTATEMENT)	4-10
4.0 TROUBLESHOOTING	4-11
5.0 REFERENCES	4-13
CHAPTER 5 CHIP SEALS	5-1
1.0 INTRODUCTION	5-1
1.1 TYPES OF CHIP SEALS	5-1
1.2 BINDER TYPES	5-2
2.0 PROJECT SELECTION	5-3
3.0 DESIGN AND SPECIFICATION	5-5
3.1 MATERIAL SPECIFICATIONS	5-5
3.1.1 <i>Binders</i>	5-5
3.1.2 <i>Aggregates</i>	5-5
3.2 CHIP SEAL DESIGNS	5-6
3.2.1 <i>Binder Application</i>	5-6
3.2.2 <i>Aggregate Application</i>	5-10

TABLE OF CONTENTS

3.2.3	<i>Application Rate for Polymer Modified an Asphalt Rubber Modified Seals</i>	5-11
4.0	CONSTRUCTION	5-11
4.1	CONSTRUCTION PROCESS	5-11
4.2	PREPARATION	5-11
4.2.1	<i>Materials</i>	5-13
4.2.2	<i>Weather Conditions</i>	5-13
4.2.3	<i>Traffic Control</i>	5-13
4.3	JOINTS	5-13
4.4	SPRAYING EQUIPMENT	5-14
4.4.1	<i>Distributor Preparation</i>	5-14
4.4.2	<i>Chip Spreader</i>	5-15
4.4.3	<i>Chip Spreading Process</i>	5-16
4.5	HAUL TRUCKS	5-17
4.6	ROLLING	5-17
4.7	BROOMING	5-18
5.0	FIELD TESTING	5-19
6.0	TROUBLESHOOTING	5-19
6.1	TROUBLESHOOTING GUIDE	5-19
7.0	REFERENCES	5-22
CHAPTER 6 FOG SEALS		6-1
1.0	INTRODUCTION	6-1
1.1	FUNCTION OF A FOG SEAL	6-1
1.2	FUNCTION OF A REJUVENATING SEAL	6-2
2.0	FOG SEAL PROJECT SELECTION	6-2
2.1	OLD OR DAMAGED SURFACES	6-2
2.2	NEW SURFACES	6-4
2.3	SURFACE PROTECTION	6-4
2.4	FOG SEAL PERFORMANCE – BENEFITS AND LIMITATIONS	6-4
3.0	FOG SEAL MATERIALS AND SPECIFICATIONS	6-5
3.1	WHAT MATERIALS ARE USED?	6-5
3.2	DESIGN CONSIDERATIONS	6-5
4.0	FOG SEAL CONSTRUCTION	6-6
4.1	SITE CONDITIONS	6-6
4.2	SURFACE PREPARATION	6-6
4.3	MATERIALS PREPARATION	6-6

TABLE OF CONTENTS

4.4	APPLICATIONS RATES AND SPRAYING	6-8
4.5	ESTIMATING APPLICATION RATES	6-8
4.6	TRAFFIC CONTROL	6-9
4.7	SAFETY (PERSONAL PROTECTIVE EQUIPMENT-PPE)	6-9
4.8	QUALITY CONTROL	6-9
4.9	POST TREATMENT	6-9
5.0	TROUBLESHOOTING	6-10
5.1	TROUBLESHOOTING GUIDE	6-10
5.2	DOS AND DON'TS	6-11
6.0	REFERENCES	6-12
CHAPTER 7 SLURRY SEALS		7-1
1.0	SLURRY SURFACING DESCRIPTION	7-1
1.1	GENERAL DESCRIPTION	7-1
1.2	PURPOSE OF SLURRY SEAL	7-2
2.0	MATERIALS AND SPECIFICATIONS	7-3
2.1	ASPHALT EMULSION	7-3
2.2	AGGREGATES	7-5
	2.2.1 Aggregate Characteristics	7-5
2.3	CEMENT AND ADDITIVES	7-6
3.0	MIX DESIGN	7-6
3.1	PRESCREENING	7-7
3.2	JOB MIX DESIGN	7-7
	3.2.1 Mixing Proportions	7-7
	3.2.2 Cohesion Build-up	7-8
	3.2.3 Abrasion Resistance (<i>Wet Track Abrasion Test – WTAT</i>)	7-8
	3.2.4 Upper Binder Limit	7-9
	3.2.5 Optimum Binder	7-9
3.3	FINAL TESTING	7-10
4.0	PROJECT SELECTION	7-10
4.1	DISTRESS AND APPLICATION CONSIDERATIONS	7-10
4.2	LIFE EXPECTANCY OF SLURRY SURFACINGS	7-11
5.0	CONSTRUCTION PROCESS	7-12
5.1	SAFETY AND TRAFFIC CONTROL	7-12
5.2	EQUIPMENT REQUIREMENTS	7-12
5.3	STOCKPILE/PROJECT STAGING AREA REQUIREMENTS	7-13
5.4	SURFACE PREPARATION	7-14

TABLE OF CONTENTS

5.5	APPLICATION CONDITIONS	7-14
5.6	QUALITY ISSUES	7-14
5.6.1	<i>Longitudinal Joints</i>	7-14
5.6.2	<i>Transverse Joints</i>	7-16
5.6.3	<i>Edges and Shoulders</i>	7-17
5.6.4	<i>Uneven Mixes and Segregation</i>	7-17
5.6.5	<i>Smoothness Problems</i>	7-18
5.6.6	<i>Damage Caused by Premature Reopening to Traffic</i>	7-18
5.7	POST CONSTRUCTION CONDITIONS	7-19
5.8	POST-TREATMENTS	7-20
5.8.1	<i>Rolling</i>	7-20
5.8.2	<i>Sweeping</i>	7-20
5.8.3	<i>Sanding</i>	7-20
6.0	TROUBLESHOOTING	7-21
7.0	REFERENCES	7-23
CHAPTER 8 THIN MAINTENANCE OVERLAYS		8-1
1.0	INTRODUCTION	8-1
2.0	DENSE GRADED THIN OVERLAYS	8-2
2.1	WHAT IS A DENSE GRADED OVERLAY?	8-2
2.2	PERFORMANCE	8-3
2.2.1	<i>Distresses Addressed</i>	8-3
2.2.2	<i>Primary Distress Modes</i>	8-3
2.2.3	<i>Job Selection</i>	8-3
2.2.4	<i>Service Life and Costs</i>	8-4
2.3	DESIGN AND SPECIFICATIONS	8-5
2.4	MATERIAL REQUIREMENTS	8-5
2.5	CONSTRUCTION	8-6
2.5.1	<i>Manufacture</i>	8-6
2.5.2	<i>Storage</i>	8-6
2.5.3	<i>Hauling</i>	8-6
2.5.4	<i>Surface Preparation</i>	8-6
2.5.5	<i>Tack Coat (Paint Binder)</i>	8-7
2.6	LAYDOWN	8-7
2.6.1	<i>Rolling</i>	8-9
2.6.2	<i>Acceptance</i>	8-10
2.7	POST TREATMENTS	8-10

TABLE OF CONTENTS

3.0	OPEN GRADED MIXES	8-10
3.1	WHAT IS AN OPEN GRADED AC OVERLAY?	8-10
3.2	PERFORMANCE	8-11
3.2.1	<i>Distresses/Conditions Addressed</i>	8-11
3.2.2	<i>Principal Distress Modes</i>	8-12
3.3	JOB SELECTION	8-12
3.3.1	<i>Where Should OGAC be Used?</i>	8-12
3.3.2	<i>When Should OGAC be Used?</i>	8-12
3.3.3	<i>Where and When Should OGAC Not be Used?</i>	8-14
3.3.4	<i>Special Maintenance Requirements of OGAC</i>	8-14
3.3.5	<i>Service Life and Costs</i>	8-15
3.4	DESIGN AND SPECIFICATION OF OGAC	8-15
3.4.1	<i>Materials Requirements</i>	8-15
3.4.2	<i>Mix Requirements</i>	8-16
3.5	MANUFACTURE AND CONSTRUCTION	8-16
3.5.1	<i>Manufacture</i>	8-17
3.5.2	<i>Storage</i>	8-17
3.5.3	<i>Transport</i>	8-17
3.5.4	<i>Laydown</i>	8-17
3.6	POST TREATMENT	8-19
3.7	SAMPLING AND ACCEPTANCE	8-19
4.0	GAP GRADED MIXTURES	8-19
4.1	WHAT IS A GAP GRADED MOISTURE?	8-19
4.2	PERFORMANCE	8-20
4.2.1	<i>Distresses/Conditions Addressed</i>	8-20
4.2.2	<i>Principal Distress Modes</i>	8-20
4.3	JOB SELECTION	8-21
4.3.1	<i>Where Should Gap Graded Asphalt Concrete be Used?</i>	8-21
4.3.2	<i>Where Should Gap Graded Asphalt Concrete Not be Used?</i>	8-21
4.3.3	<i>Service and Life Costs</i>	8-21
4.4	DESIGN AND SPECIFICATION	8-21
4.5	CONSTRUCTION	8-21
4.5.1	<i>Manufacture</i>	8-22
4.5.2	<i>Storage</i>	8-22
4.5.3	<i>Hauling</i>	8-22
4.5.4	<i>Safety</i>	8-22

TABLE OF CONTENTS

4.5.5	<i>Surface Preparation</i>	8-22
4.5.6	<i>Tack Coat</i>	8-22
4.5.7	<i>Laydown</i>	8-23
4.5.8	<i>Rolling</i>	8-23
4.5.9	<i>Acceptance</i>	8-23
4.6	POST-LAYDOWN TREATMENTS	8-24
5.0	TROUBLESHOOTING	8-24
6.0	REFERENCES	8-30
APPENDIX A	GLOSSARY OF TERMS	A-1
